

Swivel Secure on the iPhone lets you generate a One-Time-Code (OTC). To be used in combination with PINsafe to provide two factor authentication.

The Swivel iPhone app is currently undergoing final testing, and navigating the Apple store submission process.

Key Advantages

- Strong two-factor authentication
- Application available from Apple App Store
- Easy configuration
- PIN not stored, increasing security of application and usage
- 99 authentications between 'top-ups'
- Stored strings may be 'topped-up' at any time, using data/WIFI networks
- No additional software required
- No additional license required for existing customers on PINsafe V3.x
- Provides cost effective authentication for mobile users, or those operating in areas not well serviced by cellular towers
