Recommended for branch offices, wireless hotspots, and small offices with up to 50 users

The Firebox® X Edge extensible threat management (XTM) solution is a stand-alone firewall and VPN solution for small businesses, remote offices, and telecommuters.

Available in both wired and wireless versions, it's the ideal endpoint for connecting a secure VPN tunnel back to a WatchGuard XTM or Firebox X Core or Peak appliance.

Why buy an all-in-one solution?

An all-in-one network security solution slashes the time and cost associated with managing multiple single-point security products. Your IT staff has more time to focus on other areas of network administration, and your business saves money on support and hardware costs.

Earth-friendly technology

Firebox® X Edge e-Series

With a WatchGuard® Firebox® X Edge, your network is:

SECURE

- Application-layer content inspection recognizes & blocks threats that stateful packet firewalls cannot detect
- Wide-ranging proxy protection comes from robust security on HTTP, HTTPS, FTP, SMTP, POP3, DNS, TCP/UDP
- Security subscriptions boost protection in critical attack areas for complete unified threat management
- Includes integrated SSL VPN for simple, anywhere-anytime network access

EFFICIENT

- Scriptable CLI supports interoperability and allows easy integration into existing infrastructure for quick, direct connection
- Interactive, real-time monitoring and reporting – at no extra charge – give an unprecedented view into network security activity, so you can take immediate preventive or corrective actions
- Intuitive management console centrally manages all security functions
- Role-based access control (RBAC) allows top administrator to create custom roles for granular control
- Drag-and-drop Branch Office VPN setup – three clicks and your remote office is connected

FLEXIBLE

- Call setup security for VoIP means you don't need to "wire around the firewall" to take advantage of the big cost savings that VoIP can generate
- WAN and VPN failover increase performance, redundancy, and reliability
- Multiple VPN choices for flexibility in remote access
- Advanced networking features, like transparent bridge mode and multicast over VPN, allow you to add security without needing to change existing network infrastructure

WIRED OR WIRELESS – YOUR CHOICE

- Wireless models include an 802.11b/g wireless access point with WPA, WPA2, and WEP security options
- Three distinct wireless security zones (VAPs) give administrators precise control over Internet access privileges for different user groups
- Wireless guest services segment the Internet for customers/guests

CAPABLE

- Multi-layered, interlocking security protects the network
- Secure remote connectivity keeps mobile workforce productive
- Intuitive, centralized management gives you the control you need to manage efficiently
- Choice of wired or wireless models to suit your specific business requirements
- Security and reporting tools support industry and regulatory compliance
